Tuesday August 10, 2010 | 10am-4pm

10:00am – 10:10am

ADI WELCOME

10:10am – 11:00am

Taking the first step towards IP Video
Honeywell

Meet the challenges of any demanding CCTV environment while future proofing your security investment utilizing Hybrid Technology. This course will discuss how scalable integration techniques permit an easy migration path to IP solutions using a Hybrid DVR platform. By supporting both analog and IP cameras, hybrid platforms provide a smooth and easy migration path from traditional analog to digital IP video solutions.

11:00am – 12:00pm

HD IP Video Systems
SONY

HD Megapixel camera technology is rapidly expanding the capabilities of IP Video Systems. This course will focus on advantages of HD cameras, H.264 and MPEG4 compression, giving insight into system design, camera resolution, bandwidth and storage calculations.

12:00pm – 2:00pm

Lunch ■ Tabletop Displays
Honeywell ■ SONY ■ D-Link ■ Milestone
Everfocus

2:00pm – 3:00pm

Learn how to expand your business by
selecting the right switch
D-Link

Networks today demand it all – high bandwidth, converged architectures, guaranteed interoperability, robust security and future compatibility. D-Link Systems understands that when putting together a solution, you need equipment that can easily integrate with your existing infrastructure. This class will teach you how to configure switches in a security, voice, video or data applications and how you can cost effectively provide a scalable solution to fit your business needs. There are a broad range of switches available; let D-Link help you understand which switch to select for each IP opportunity.

3:00pm – 3:50pm

Intelligent IP Video Surveillance
Milestone

This presentation will review the technological advantages of IP Video Surveillance – Why non-proprietary, open architecture systems are important. Understand how enhanced security and reduced costs of ownership enabled by IP Video surveillance can be realized throughout an implementation.

3:50pm – 4:00pm
